VIDYA'S KITCHEN · ENTERPRISE SYSTEM ARCHITECTURE

Multi-Surface UI Design System

Production token baseline across Customer PWA, Driver App, and Kitchen Dashboard

This document codifies the design system as implemented in production code (vidyaskitchenhome.com). Rather than a theoretical UI kit, every measurement, hex token, and radius value corresponds directly to live components. The interface operates on Outfit typography across three distinct functional environments.

01. CUSTOMER PWA

Warm #F5F5F7 canvas · #BD2320 primary · 52px button · 28px bottom sheets

LIGHT GLASS

02. DRIVER APP

Near-black #0A0A0A canvas · #E84040 alert · #34D469 delivery · 14px controls

SUNLIGHT HIGH CONTRAST

03. KITCHEN DASHBOARD

#0D0D0D desk · #141414 shell · #F5E32D action yellow · 12px card grid

DARK DESK SHIFT

Multi-Surface Architecture

A unified brand identity deployed across three purpose-built ergonomic environments.

Vidya's Kitchen is designed as a synchronized ecosystem with three distinct operational roles. Rather than forcing one generic responsive template across all screens, each surface is tuned for its human context: home comfort, outdoor mobile transit, and intensive kitchen station operation.

SURFACE ERGONOMICS BREAKDOWN

- **Customer PWA (Home Dining):** Built for relaxed browsing on high-DPI smartphone displays. Soft warm gray background (#F5F5F7) and translucent white cards give food photography maximum appetizing focus without visual fatigue.
- **Driver App (Outdoor Sunlight):** Engineered for two-wheeler couriers checking screens at daylight traffic stops. Pure dark canvas (#0A0A0A) eliminates glare, while high-saturation signal colors (#E84040, #34D469, #F5A623) ensure split-second readability.
- **Kitchen Dashboard (Commercial Desk):** Tuned for station managers working 8+ hour evening prep shifts. Dark desk canvas (#0D0D0D) prevents retinal strain, while bright yellow (#F5E32D) is strictly reserved as an action beacon for urgent operations.

SHARED GEOMETRY & RADIUS HIERARCHY

- **Customer Surfaces:** Generous organic radii (20px to 28px). Primary buttons use 18px radius; bottom sheets and choice drawers feature 28px top radii for natural thumb gestures.
- **Driver Controls:** Compact, precise 14px to 16px radii. Status tags and payment reconciliation indicators use full circular pills (radius 999px).
- **Dashboard Workspace:** Structured 12px panel cards on a 14–20px outer floating shell. Data inputs and action triggers maintain a 8px radius for desktop density.
- **Minimum Touch Target:** All mobile touch targets across phone surfaces strictly observe a minimum height of 44px to 52px, exceeding WCAG 2.1 AAA accessibility thresholds.

TYPOGRAPHY STANDARD

- **Primary Typeface:** Outfit across all three environments (weights 500, 600, 700, 800, 900).
- **Editorial Constraints:** Zero secondary fonts for functional controls, buttons, or price tags. Mono styling is strictly confined to telemetry coordinates and invoice IDs.

Customer PWA Specification

Translucent glass tiles over a warm neutral canvas, allowing fresh meals to lead.

LIVE COLOR TOKENS

Canvas #F5F5F7	**Brand Red** #BD2320	**Body Text** #1A1A1A
Pure White #FFFFFF	**Verified Green** #22C55E	**Rating Star** #FBBF24

Secondary body copy is set to rgba(0,0,0,0.65). Eyebrows and auxiliary metadata use rgba(0,0,0,0.42). Structural borders maintain crisp 1px borders at rgba(0,0,0,0.06). Brand red tints feature an 8% background wash, 18% border stroke, and 25% glow shadow.

CUSTOMER TYPE SCALE

ROLE	SIZE	WEIGHT	DESIGN APPLICATION
Display	36px	800	Hero greeting & welcome header
Hero Price	30px	800	Order total headline & dish spotlight
Title	24px	800	Screen titles: Checkout, Menu, Cart
Sheet Title	20-22px	800-900	Size selection & OTP drawers
Section	17px	800	Your Order, Delivery Address headers
Dish Name	16-18px	700	Primary menu item title on grid cards
Body Copy	15px	500	Menu item descriptions & meal notes
Field Label	15px	700	Form inputs, delivery instruction tags
Primary CTA	16px	900	Add to Cart, Complete Order buttons
Badge Pill	10-12px	700-800	Discount chips, spice indicators

RECREATED PRODUCTION COMPONENTS

- **Primary Action CTA:** 52px height, 18px radius, #BD2320 red background, bold white label, and 0 8px 24px rgba(189,35,32,0.25) elevation glow.
- **Size & Portion Drawer:** Top radius 28px bottom sheet with 36x4px gray grab handle. Variant cards with 52px icon wells, quantity counter with 44px pill container.
- **Verification Ring & Chip:** 56px circular green status ring (rgba(34,197,94,0.14)) paired with white 999px pill chip for OTP confirmation.

Driver App Specification

Ultra-high contrast outdoor mobile interface for fast dispatch comprehension on the road.

DRIVER COLOR TOKENS

Night Canvas #0A0A0A	**Job Card Tile** #141414	**Direct Text** #FFFFFF
Action Red #E84040	**Delivered Green** #34D469	**Cash Attention** #F5A623

Subdued text utilizes white at 46% opacity. Minimal container boundaries use white at 7% and 12% opacity. Status signals feature a dedicated 10% background tint for icon wells and contextual pills.

OUTDOOR ERGONOMIC TOKENS

- **Visual Contrast:** Background stays anchored to #0A0A0A. Contrast ratio exceeds 14:1 for white typography on night cards, preventing glare during daylight transitions.
- **Component Geometry:** Job cards use a 16px radius with 1px border at rgba(255,255,255,0.12). Action buttons feature a 14px radius and 48px touch height.
- **Cash Callout Banner:** Amber #F5A623 background tint (rgba(245,166,35,0.12)) with bold 13px warning label to prevent unpaid cash delivery handoffs.
- **Icon Standard:** Lucide icons rendered at 20px with 2px stroke weight for package, navigation, clock, cash, and phone contact.

KEY DRIVER SCREENS

- **Shift Authentication:** Phone PIN login with oversized 56px keypad tap targets.
- **Active Run List:** Chronological queue displaying drop-off location, meal count, promised slot, and cash collection badge.
- **Delivery Handoff:** One-tap Google Maps launch, direct customer call trigger, and high-visibility 'Mark Delivered' completion button (#34D469).

Kitchen Dashboard Specification

Low-glare dark control center for high-volume shift management and live order dispatch.

DASHBOARD COLOR TOKENS

Base Page #0D0D0D	**Shell Panel** #141414	**Data Card** #1A1A1A
Form Input #222222	**Action Yellow** #F5E32D	**Live Green** #86EFAC

Sidebar idle navigation text is #888888. Active navigation row features pure #F5E32D yellow fill with #000000 black text and icon. Panel border is #222222; card border is #2A2A2A. Destructive triggers use #F87171.

CONTROL CENTER LAYOUT SPECS

- **Sidebar Navigation:** Dark #0D0D0D 240px default width (collapses to 72px icon rail). Navigation rows are 44px min-height with a 12px radius.
- **Floating Shell Container:** Dark #141414 workspace enclosed in a 14px to 20px rounded shell with 0 8px 32px rgba(0,0,0,0.45) elevation.
- **Action Buttons:** Transparent fill with 1px border in #F5E32D at 40% opacity, yellow text, and an 8–10px radius for compact desktop toolbars.
- **Live Status Pill:** Green border tint (rgba(134,239,172,0.3)) with pulsing green icon for items active on the consumer storefront.
- **Input Fields:** Dark #222222 background, #2A2A2A border, 8px radius, and 14px crisp white text.

OPERATIONAL MODULES COVERED

- **Live Order Board:** Real-time kitchen ticket queue with automated alert sounds and elapsed cooking countdowns.
- **AI Pricing Engine:** Predictive surge recommendations with manual 'Approve & Deploy' safeguards.
- **Inventory & Offers:** Universal promotional cards sharing identical live toggles and yellow confirmation buttons.

Governance & Decision Matrix

Strict separation of concerns to prevent cross-surface design drift.

SURFACE CROSS-REFERENCE MATRIX

SURFACE TARGET	HEIGHT / SIZE	RADIUS	PRIMARY COLOR TOKEN & USE
Customer Button	52px tall	18px	Red #BD2320 fill, white text, 24px red glow
Customer Sheet	Max 92vh	28px top	Warm #F5F5F7 canvas, 36x4px grab handle
Customer Price	16-24px	Pill / Raw	Always heavy 900 weight, brand red on primary
Driver Status	28-32px	Full Pill	Amber #F5A623 (cash), Green #34D469 (delivered)
Driver Action	48px tall	14px	High-contrast #34D469 fill or outlined white
Dashboard Action	32-36px	8-10px	Yellow #F5E32D hairline, transparent background
Dashboard Card	Variable	12px	#1A1A1A card resting on #141414 shell

SYSTEM MANDATES (DO'S)

- **Color Discipline:** Strictly isolate primary anchors per surface: Brand Red (#BD2320) for Customer, Outdoor Green/Amber for Driver, and Action Yellow (#F5E32D) for Dashboard.
- **Bill Itemization:** Always render meal subtotal, packaging, delivery fee, and GST as separate lines. Never obscure statutory tax inside general charges.
- **Typographic Weight:** Reserve weight 800-900 strictly for active numbers and operational verbs; utilize weight 500 for descriptive context.
- **Touch Target Rule:** All interactive elements on phone surfaces must maintain a minimum bounding box of 44px by 44px.

STRICT PROHIBITIONS (DON'TS)

- **No Dashboard Leaks:** Never apply the dashboard yellow button style to customer food menus.
- **No Glass on Drivers:** Never import translucent customer glass cards into the high-contrast outdoor driver interface.
- **No Pure Black Text:** Never use pure #000000 text on the customer PWA; use #1A1A1A to preserve soft organic contrast.
- **No Typeface Fragmentation:** Never introduce a second font family for price tags, numbers, or button labels.
