Hiring Team & Design Leadership
Cognizant Interactive / Digital Experience
Chennai, Tamil Nadu, India

APPLICATION: Senior UX Designer (Job ID: 00070999291) — Chennai

Dear Hiring Team,

I am writing to express my strong interest in the **Senior UX Designer** role at **Cognizant** in Chennai. Having spent 6+ years orchestrating digital product strategy, complex enterprise architectures, and user-centered design across B2B, SaaS, and retail environments, I am eager to bring my combined interaction design leadership and technical execution to Cognizant's global client engagements.

Throughout my career, I have focused on solving high-friction, mission-critical workflow problems by converting ambiguous business requirements into intuitive, measurable user experiences:

- **Enterprise Platform Architecture:** Designed high-density operational telemetry dashboards, including EV battery pack health (SoH) diagnostics for iRasus and dual-role rural ATM replenishment workflows for IndiaOne ATM, balancing high data density with rapid situational comprehension.
- **Enterprise Retail & Client Consultation (Nebraska Furniture Mart):** At Parla Retail, worked directly with US enterprise stakeholders to design the "Show & Sell" remote video consultation suite and automated appointment scheduler, delivering a +31% lift in booking completion and a 26% drop-off reduction.
- **Discovery & Usability Validation:** Conducted end-to-end qualitative research, persona mapping, and task analysis for Vidya's Kitchen, architecting a unified ordering ecosystem that reduced transaction handling time by 40% while validating usability hypotheses with Maze.
- **Bridging Design and Engineering:** As a Design Engineer proficient in HTML5, CSS3, JavaScript, and Next.js, I eliminate developer-designer handoff bottlenecks, establishing scalable Figma design tokens and component libraries that ensure what is designed is implemented with pixel precision.

Being based in Chennai, I am fully available for the hybrid model and immediate alignment with Cognizant's engineering and product squads. I would welcome the opportunity to discuss how my user research rigor, enterprise interaction design experience, and cross-functional leadership can deliver immediate value to Cognizant and your enterprise clients.

Sincerely,

Santhosh A
Design Engineer & Senior UX Designer
