Hiring Team — Foundational Technologies (R&D)
Siemens Technology and Services Private Limited
Chennai, Tamil Nadu, India
Re: UX Designer (Job ID: 526732)

Dear Siemens Design Leadership,

I am writing to express my enthusiastic interest in the **UX Designer** position (Job ID: 526732) within Foundational Technologies at Siemens Technology and Services in Chennai. With 5+ years of experience designing real-time operator dashboards, telemetry interfaces, and scalable design systems for complex engineering and automation workflows, I am eager to contribute directly to Siemens' electrical and industrial automation platforms.

Your job description specifically calls for a designer who can *"bring structure to complexity, turn conversations into working prototypes quickly, and leverage AI-assisted workflows to move faster, not think less."* This ethos represents how I build digital experiences:

- **Structuring Complex Engineering Telemetry:** For **iRasus Technologies**, I designed mission-critical EV battery pack analytics dashboards, translating multi-sensor battery data (State of Health - SoH, real-time thermal curves, cell voltage deltas) into actionable alerts for fleet engineers. For **IndiaOne ATM**, I designed dual-role field telemetry screens and logistics workflows that optimized rural cash replenishment and diagnostic uptime.
- **AI-Assisted Workflows & Rapid Functional Prototyping:** Holding a B.Tech in Information Technology from Loyola-ICAM, I actively incorporate LLM-assisted workflows, Cursor, and React/TypeScript into my daily design practice. Rather than waiting for exhaustive briefs, I translate conceptual conversations into high-fidelity Figma component systems and interactive, code-level prototypes that validate engineering constraints early.
- **B2B Enterprise & Global Collaboration:** At **Parla Retail** (UK HQ), I worked directly with US enterprise stakeholders at **Nebraska Furniture Mart** to architect the "Show & Sell" interactive consultation suite, achieving a +31% lift in booking completion and a −26% drop-off reduction. At **Intellemo.AI**, I led the UI/UX overhaul of complex multi-variable marketing analytics platforms.

Being based locally in Chennai, I am excited about the opportunity to collaborate closely with your engineering and product teams on-site to shape mission-critical digital experiences. You can explore my detailed case studies and interactive work directly at **designbysanthosh.com**.

Thank you for your time and consideration. I welcome the opportunity to discuss how my telemetry design experience and rapid prototyping capabilities can support Siemens' foundational technologies.

Sincerely,

Santhosh A
UX Designer & Design Engineer
